Custom Tower Clocks

Sales & repairs

Who are we?

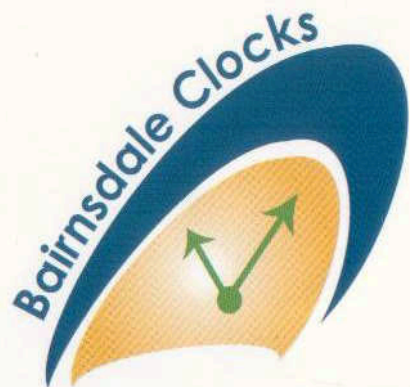

Bairnsdale Clocks is an established family business, which has been operating for two generations. Our business is built on prompt, reliable and friendly country service. We restore and repair antique and modern clocks and barometers, and have a wide range of clock components for sale.

We turned our attention to tower clocks in 1992, following a growing market demand for higher levels of service throughout the manufacturing, engineering and designing of tower clocks. We have acquired a significant share of this market, due to our ability to listen and respond to customers' needs.

Our company supplies and services community clocks to town councils, hospitals, heritage-listed churches, shopping complexes and other public and private organisations.

Some regional examples

- *St Paul's Church, Bendigo—3 dials at 2 metres*
- *Eaglehawk Town Hall—1 dial at 2 metres*
- *Bendigo Town Hall—4 dials at 2 metres*
- *Lakes Entrance, 2 dials at 1.2 metres*

What makes us different from the others?

Our team provides friendly, prompt service with an eye for attention to detail.

Our clocks and mounts are specifically designed to suit your application, and will give you guaranteed reliability for many years.

We install technically advanced public clocks, with GPS to give precision time-keeping.

Advantages of these tower clocks systems

- All the time keeping components and movements are Swiss and European made, of the highest quality directly imported from Europe.
- Our clocks use global positioning system (GPS) to ensure accurate time keeping.
- GPS automatic time update is incorporated.
- Daylight saving times automatically changed without operator intervention.
- Clocks are maintenance free for over 20 years
